TRITANIUM™ BETA TITANIUM STRAIGHT WIRE

Highly resilient Tritanium™ Beta Titanium Wire is a high-force wire with superior malleability and low deflection. It comes in fourteen-inch sections and has a smooth surface for less frictional force. This Nickel-Free straight wire is perfect for mid to late stages of treatment. It works perfectly for aligning, rotation, space closure, custom tipping and tooth movement.

Blue Nickel Cobalt Straight Wire

BLUE NICKEL COBALT

BLUE NICKEL COBALT STRAIGHT WIRE

Our Blue Nickel Cobalt Wire is very forgiving and malleable, making it perfect for intricate bending. This wire comes in fourteen-inch sections for easy use. The ability to heat treat after formation allows our wire to increase resiliency and strength significantly. The Blue Nickel Cobalt wire is preferred by laboratory technicians because of its excellent use with removable and functional appliances, as well as archwires. Works well with our Hilgers & Ricketts* prescription.
