

Aligner Pliers

Tear Drop Punch Aligner Pliers

Adds a hook or notch on the gingival margin of the retainer for holding an elastic. Can be used to improve aligner retention.

Vertical Indent Aligner Pliers

Used to place a vertical indent in the retainer to assist in tooth movement.

Horizontal Indent Aligner Pliers

Places a horizontal indent to aid in root torque.

Dimple Aligner Pliers

Creates a small punch at the gingival margin of the retainers.

6mm Punch Aligner Pliers

Punches a half-moon shaped area on the gingival margin to allow for buttons, tubes or brackets. Can be used to alleviate areas that may be irritated by the retainer.

Dimple Eraser Aligner Pliers

The flat surface of the eraser plier reduces or flattens the dimple to remove the pressure.
